

VET4FOOD

VET Training for Food Sustainability

THE PROJECT

Sustainable food system and VET education innovation can provide high-quality green jobs and permit to create new professional and entrepreneur profiles to fight unemployment and at the same time combat climate change and environmental decline from the food (and in part tourism) industry as well as promote the green transition of existing companies and the creation of new ones.

GOALS & ACTIVITIES

Reduce the training gap within food VET schools.

Food Sustainability VET Module will introduce food sustainability to teachers looking at food, social, economic, and nutritional areas of study.

Improve the quality and efficiency of mainstream VET training.

Food Sustainability VET Teachers' Training will increase competences of teachers participating on food sustainability and edutainment technique for both online and in person activities.

Impulse the embedding sustainability in food VET school's curricula .

Food Sustainability VET Students Training will be developed by teachers to test the contents and techniques acquired through the training course Food Sustainability VET Teachers' Trainings.

Make VET teachers aware of the importance of increasing student participation .

Edutainment techniques and digital tools handbook for VET teachers will include important elements of edutainment and digital tools for the teaching.
