

THE PROJECT

Planning Seeds aims to create a shared European methodological framework and a Handbook for the creation and management of Solidarity Economy Districts. Extending from a local experimentation level to a common shared methodology, Solidarity Economy Districts can increase resilience by promoting diverse rural-urban linkages, reducing dependence on external factors and supporting participatory governance to produce proactive and integrated policies.

[DOWNLOAD](#) the general project information

TARGET GROUPS

- Young vulnerable adults (18-35)
- Seniors (65+)
- Stakeholders working on social economy field

GENERAL OBJECTIVES

Improve the recognition of the social economy and its potential by raising awareness and visibility through local social experiments of short food supply chain.

SPECIFIC OBJECTIVES

- To train local communities in the creation of SFSCs and Solidarity Economy Districts (SEEDs) connecting citizens and key territorial stakeholders for the promotion of social, economic and environmental sustainability principles indicated by the European CAP post-2020, Green Deal and Farm to Fork strategies.
- Building a community of practice at European level to connect citizens, interested organisations and local administrations to create territorial development using different methods of action at local level based on the principles of democracy, equality, equity and solidarity.
- Respond to the issues of the social economy sector as outlined in the Staff Working Documents accompanying the Social Economy Action Plan.

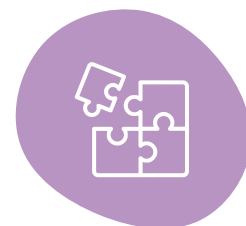

MAIN ACTIVITIES

Report at EU and National level, on the result of a desk (focus on the mapping of policies frameworks in partners countries) and field research (focus on 5 different coaching circles in each partners country)

Multidisciplinary frameworks to be developed at a European level for the creation of integrated and replicable social economy experiments relating to the EntreComp and GreenComp frameworks

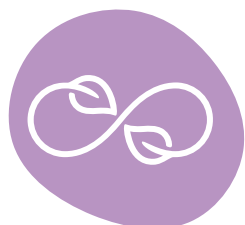

Develop policy recommendations and guidelines for local governments and policy makers on supporting the social economy through the creation, support and promotion of SEEDs

Develop an online ecosystem for coordinating SEEDs, animating a community of practice, and training other local communities not participating in the project

Create support figures for SEEDs to ensure their long-term economic sustainability
